

Chain of Thought: -

S NO	Possible Cause	Validation	Expected Discovery
1	Daily Limit Exceeded	The transfer pushes the account past its daily outbound limit (e.g., standard UPI ₹1 Lakh daily cap, bank-specific per-transaction caps, or newly set custom user limits)	Daily limit exceeded
2	Insufficient Balance	The source account holds less than ₹50,000 (plus any applicable transfer fees or minimum balance requirements).	Insufficient balance
3	Beneficiary Inactive	The destination account is frozen, dormant, closed, or restricted from accepting incoming credits (e.g., due to KYC non-compliance)	Beneficiary inactive
4	OTP / MPIN Expired	The authentication token or One-Time Password expired before the user submitted it, or was invalidated due to multiple failed entry attempts	OTP expired
5	Fraud Rule Triggered	A high-value transfer (₹50,000) flags automated risk systems—such as a new device login, unusual geo-location, velocity check, or high-risk recipient address—causing the fraud engine to temporarily block execution	Fraud rule triggered
6	Network Timeout	The request drops or times out in transit between the client application, API gateway, or Payment Service Provider (PSP)	Network timeout
7	Bank Server Unavailable	The remitting or beneficiary bank's payment gateway server is down or unresponsive.	Bank server unavailable
8	UPI Switch Unavailable	The central switch infrastructure (e.g., NPCI) or PSP engine experiences an outage or scheduled maintenance window	UPI switch unavailable
9	Core Banking System (CBS) Unavailable	The bank's main ledger database is locked, undergoing batch processing, or failing to acknowledge debits/credits	Core banking unavailable
